ATLAFEN 2,5 %

ORAL SUSPENSION

COMPOSITION

Fenbendazole	2.50 g
Excipient qs	100 ml

PHARMACEUTICAL PROPERTIES

Fenbendazole is an anthelmintic from the benzimidazole family with great activity against gastrointestinal and pulmonary nematodes and on the taenia. Fenbendazole, like other benzimidazoles, works by inhibiting the polymerization of microtubulin, causing cell disorganization and death of the parasite by starvation. From a pharmacological point of view, fenbendazole is metabolized in the body into several metabolites including oxfendazole, which has great anthelmintic activity.

TARGET SPECIES

Cattle, sheep and goats.

INDICATIONS

Treatment of internal parasitic diseases: gastrointestinal and pulmonary nematodes and teniasis.

ADMINISTRATION AND DOSAGE

Oral use using a syringe or dosing gun. Sheep and goats:

- Gastrointestinal strongyloses and Dictyocauloses sp: 5 mg / kg or 2 ml / 10 kg bodyweight.
- Moniezioses and other pulmonary strongyloses: 10 to 15 mg / kg or 4 to 6 ml / 10 kg bodyweight.

Cattle: 7.5 mg / kg or 3 ml / 10 kg bodyweight.

CONTRAINDICATIONS AND INTERACTIONS

Do not combine with bromosalicylanilide. May be combined with dicide triclabendazole, levamisole.

SIDE EFFECTS

If the general conditions of use are respected, no undesirable effects are observed after treatment with Fenbendazole

PRECAUTIONS FOR USE

- Adopt the prescribed dosages in females at the beginning of gestation.
- Shake well before use.
- Keep the product out of the reach of children

WITHDRAWAL PERIOD

Meat and offal: 14 days. Milk: 3 days.

STORAGE CONDITIONS

Keep the product in the original packaging, protect from light and at a temperature $\leq 25^{\circ} \text{C}$.

PRESENTATIONS

Bottles of 250 ml, 500 ml and 1 liter.
