

ATLAS VETERINAIRE

ATLATERASOL-L

ORAL SOLUTION

COMPOSITION

DL -Tetramisole (except hydrochloride) 5.00 g
Excipient qs 100 ml

PHARMACEUTICAL PROPERTIES

Tetramisole is an anthelmintic from the imidazothiazole family with great activity on the larval and adult forms of gastrointestinal and pulmonary strongles. The mode of action of Tetramisole is linked to muscle paralysis of the parasites. Tetramisole is well absorbed orally, it diffuses well in all tissues which allows it to reach pulmonary nematodes and forms in hypobiosis. Tetramisole is quickly metabolized by the liver and eliminated via the urine and bile.

TARGET SPECIES

Sheep, goats and cattle.

INDICATIONS

Treatment of gastrointestinal and pulmonary strongylosis in ruminants.

ADMINISTRATION AND DOSAGE

ATLATERASOL-L is recommended orally at a dose of 15 mg of active ingredient / kg of bodyweight, ie 3 ml of solution per 10 kg of bodyweight.

CONTRAINDICATIONS AND INTERACTIONS

Do not use in dairy females whose milk is intended for human consumption. Do not use in equines. Do not combine with organophosphates and any other substance that inhibits neuromuscular transmission

SIDE EFFECTS

If the doses are respected, no side effects are observed in the target species. If signs of intoxication are observed, however, atropine is the first choice antidote for Tetramisole.

ATLAS VETERINAIRE

PRECAUTIONS FOR USE

- Adopt the prescribed dosages
- Shake well before use.
- Keep the product out of the reach of children.

WITHDRAWAL PERIOD

Meat and offal: 7 days.

STORAGE CONDITIONS

- Keep the product in the original packaging,
- protect from light and at a temperature $\leq 25^{\circ}$ C.

PRESENTATIONS

500 ml bottles, 1 liter. 2- and 5-liter cans.
