

ATLAMENTHOL

NUTRITIONAL SUPPLEMENT BASED ON NATURAL ESSENTIAL OILS

COMPOSITION

Menthol	10.5%
Eucalyptus oil	10.5 %
Polysorbate 80	5.0%
Polyethylene glycol ...	40%
Purified water qsp	100%
Glycerol 20.0 %	

BIOLOGICAL PROPERTIES

ATLAMENTHOL is a nutritional supplement, based on water-soluble essential oils. Due to the freshness of the Eucalyptol and Menthol mixture the product has a positive influence on the taste and smell of food. At the same time, they ensure better breathing by clearing the airways in the event of their obstruction by secretions, and therefore make it possible to improve the well-being of the animals. These natural essential oils can stimulate the appetite and have a regulating and stabilizing effect on the intestinal flora.

TARGET SPECIES

Poultry.

GENERAL USES

- Helps with better breathing during respiratory problems;
- Helps birds to recover after the stress of vaccination against respiratory diseases (Bronchitis infection or Newcastle disease);
- Ensures the comfort of the birds in the event of heat stroke, bad ambient conditions;
- Can be used as a complement to antibiotic treatments or when they are contraindicated;

SPECIAL USE Use on the 3rd day after vaccination against ND for: 3 to 5 successive days; 3 more days if recovery is not complete.

METHOD OF USE - In the drinking

water by preparing a dilute solution which is added to the water tank.

- In spray in case of heat stroke, when the water contains drugs or when the vaccine reaction is in progress.

INCORPORATION RATE - In drinking

water, mix 250ml of ATLAMENTHOL in 1000 liters of water.

NB: If the water consumption decreases, reduce the doses of the ATLAMENTHOL product to 200ml for 3 to 5 days.

- **As a spray**, for a building of 1000 m³, mix 250 ml of the ATLAMENTHOL product in 10 liters of water. Use 2 times a day and repeat 3 times a week, until complete recovery.

PRECAUTIONS FOR USE Do not use

ATLAMENTHOL at the same time with drugs in the drinking water, if necessary, use the drugs for 12 hours, then change the water and administer ATLAMENTHOL for the next 12 hours.

WITHDRAWAL PERIOD None.
